

Practical2:Creating account, repository on Github and Cloning repository in Github

a) Creating Account

Step:1 - Go to Github.com and click on sign up

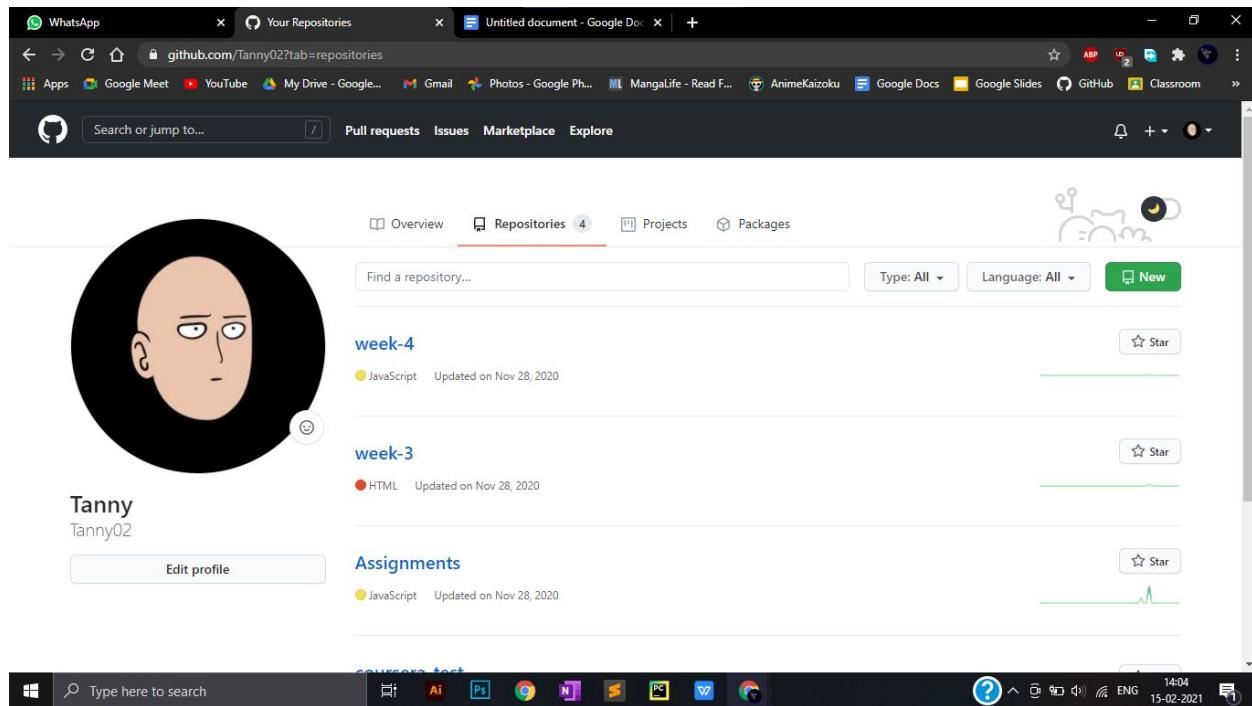

Step:2 - Click on “create account”

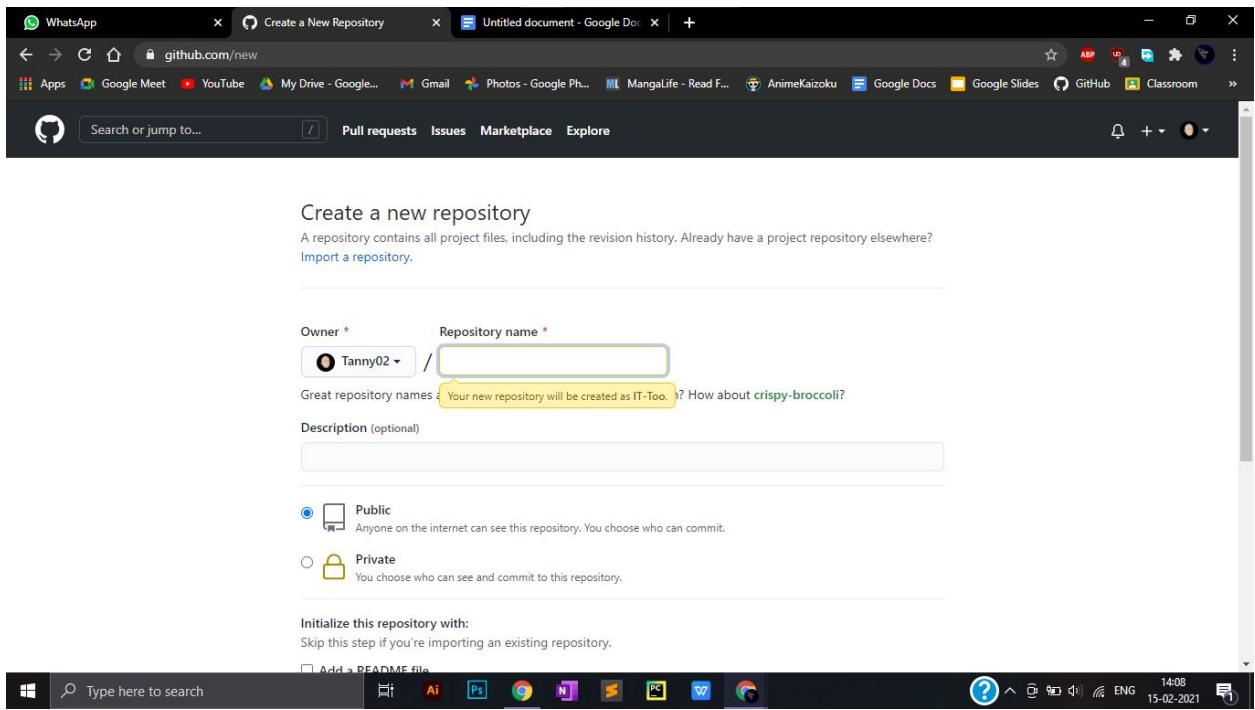

b) Create Repository

Step:1 - Login in your account and click on repositories

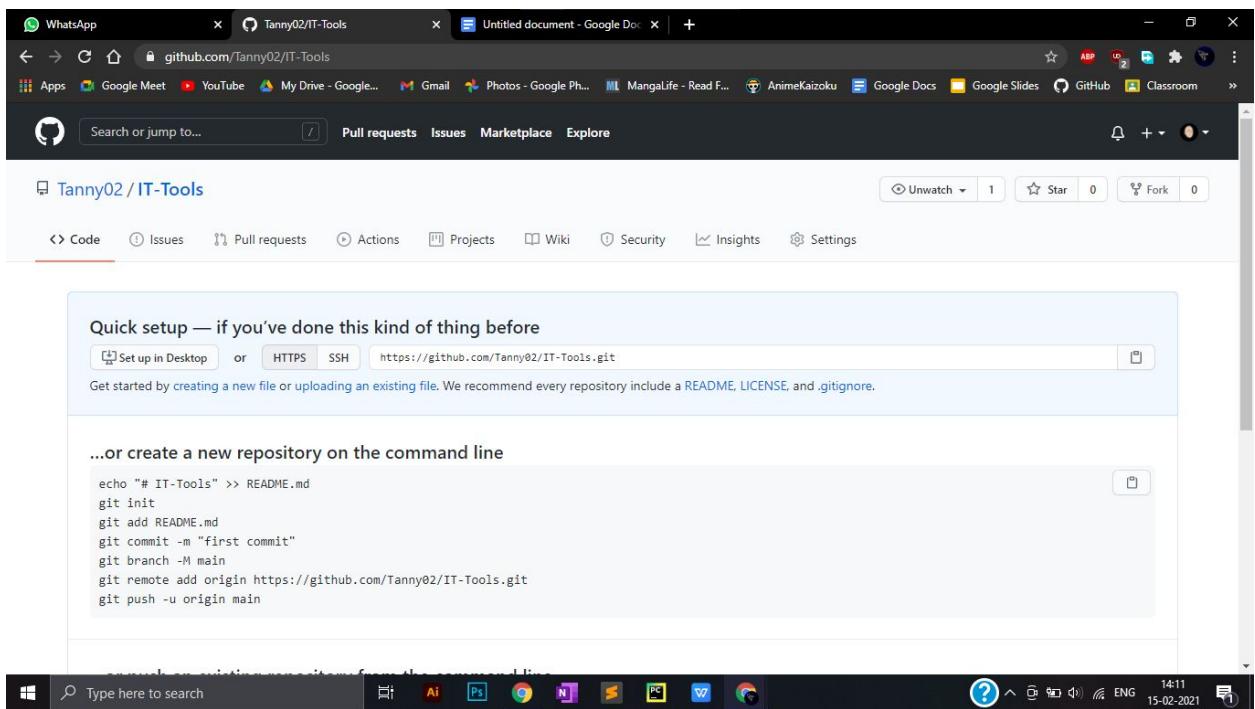

Step:2 - Click on “new”

Step:3 - Enter a name for your repository and enter description of the repository if you want . You can choose if you want to make your repository private or public.

Step:4 - Click on “create repository” and your repository is created

c) Cloning Repository

Step:1 - Go to the repository and click on “code”

The screenshot shows a Windows desktop environment. At the top, there is a taskbar with various pinned icons including WhatsApp, Google Meet, YouTube, My Drive - Google..., Gmail, Photos - Google Ph..., MangaLife - Read F..., AnimeKaizoku, Google Docs, Google Slides, GitHub, and Classroom. Below the taskbar, a browser window is open to the GitHub repository 'Tanny02/IT-Tools'. The repository page displays basic information like the main branch, 1 branch, 0 tags, and 1 commit. A file named 'ITprac1.pdf' is listed under the commit. There are tabs for Code, Issues, Pull requests, Actions, Projects, Wiki, Security, Insights, and Settings. On the right side of the page, there are sections for About, Assignments, Releases, and Packages. The status bar at the bottom of the screen shows the date as 15-02-2021 and the time as 14:15.

Step:2 - Select “https” and copy the link provided

This screenshot is identical to the one above, showing the same GitHub repository page for 'Tanny02/IT-Tools'. However, a context menu is open over the 'Clone' button in the 'Code' dropdown. The menu options include 'Clone' (selected), 'HTTPS', 'SSH', and 'GitHub CLI'. The 'HTTPS' option is highlighted with a red box, and its corresponding URL 'https://github.com/Tanny02/IT-Tools.git' is also highlighted. The status bar at the bottom of the screen shows the date as 15-02-2021 and the time as 14:17.

Your Repository has been Cloned and You can share the link to others and they can access the repository Directly through the link
